

LITOSTAIN CLEANER

STAIN REMOVER FOR COLOURED STAINS ON ALL MATERIALS

DESCRIPTION

Litostain Cleaner is a water-based gel cleaner for the removal of coloured stains. The product can be used on all materials.

FIELDS OF APPLICATION

Litostain Cleaner is a versatile product that can be used on all ceramic and natural stone surfaces. It easily extracts coloured staining agents such as coffee, red wine, fruit, fruit juices, mould, algae, ink etc. The product's viscous texture guarantees longer contact with the stain and also allows vertical applications.

APPLICATION

The pure product is applied directly on the stain and left to act for 10 to 20 minutes in the case of fresh stains, or even overnight for more stubborn stains. After this time, remove the product using a clean cloth and rinse well. If improvement is noticed after the first application, repeat the process using the same methods.

WARNINGS

- Do not apply the product to wet or heated surfaces.
- Do not use the product in combination with other chemical products.
- Do not use to remove oil stains.
- In the case of highly absorbent surfaces, moisten slightly with water before applying the product.
- Do not use the product for applications not specifically stated in this data sheet.

IDENTIFICATION DATA

Appearance	Clear gel
Colour	Colourless
Odour	Hypochlorite
Flammable	No
Customs code	3824 90 97
pH	11.5 ± 0.5
Specific gravity	11200 ± 10 g/l
Flash point (ASTM D 56)	Not flammable
Preservation time	12 months in original packaging in a well-ventilated and dry environment.

APPLICATION DATA

Allowed temperatures of application	From +5°C to +35°C
Period of surface treatment	From 10 to 20 minutes, up to a few hours
Consumption	Dependent on the size of the stain
Packaging	0.5 litre plastic bottles

SAFETY INFORMATION

Consult the Material Safety Data Sheet, available on request.

PRODUCT FOR PROFESSIONAL USE

Although the information provided in this technical data sheet is accurate to the best of our knowledge and experience, it is intended purely as a guideline.
The user must carry out preliminary practical tests for each specific job and is solely responsible for the final result.
